OPPORTUNITIES

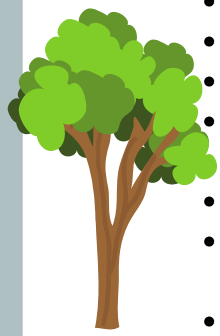
Green Careers Week takes place from 4th-9th November. It is an exciting event that raises aspiration, supports diversity, challenges stereotypes, and promotes real opportunities for young people to have a career that will genuinely make a difference.

Below you will find a number of ways that you can discover careers, jobs, roles, and career pathways that are green careers and develop green skills.

What is a green career anyway? A green career can be any job, role or occupation that contributes to preserving or restoring the environment and our planet. It can be any industry, not just those seen as 'green.' Green skills are abilities, attributes, values, attitudes, knowledge, and technical skills needed to adapt services, processes and procedures to support climate change.

Within this document, you can explore all the different Springpod experiences that you could take part in to develop green skills and learn more about relevant industries.

If you don't have time to complete a full virtual work experience placement, a shorter university experience may be a better option. Here are some that relate:



- Sustainable Engineering. Saving Planet Earth
- The time is now. Ecology, biodiversity and extinction
- How can lawyers combat climate change
- Redefining sustainability in architecture and the built environment
- Green energy and transportation. Paradigms and solutions
- Designing our future: the importance of sustainable architecture
- Climate change. The impact on women in the global south

Take a look at the Green Careers Hub where you can find careers advice, job profiles and live jobs from employers.
